-  **Sensation, Finest Mixed.** Mammoth flowers with broad, heavy, fluted petals. Early flowering, blooming in 10 weeks from time of seeding. **Pkt. 15 cts.; ½ oz. 35 cts.**

Cynoglossum (A)

-  **Firmament.** A new dwarf type of Chinese Forget-Me-Not. Bushy plants, 15 to 18 inches tall, with rich blue flowers. **Pkt. 15 cts.**

Cream Star Petunia

The Russell Lupins (P)

The most outstanding strain of hardy Lupins ever developed. Long symmetrical, closely furnished spikes in an indescribably rich variety of brilliant colors—self and bi-colors—reds, oranges, pure deep yellow, and many other colors never seen here before in hardy Lupins. Height 2½ to 3½ feet. **Pkt. 20 cts.**

Marigold

-  **Crown of Gold.** A. The first Marigold with odorless foliage. Its fragrant, orange-yellow flowers are 2½ inches across, with centers of short, curled, quilled petals and a collar of flat guard petals on outside. The plants are 2½ feet tall, spreading, and bloom profusely early in the season. **Pkt. 15 cts.**
-  **Lime Light.** (Bronze Medal.) A new color, pale primrose yellow or deep cream, of the incurved chrysanthemum-flowered type. The flowers, 1½ to 2½ inches across, are produced abundantly for 8 or 9 weeks. **Pkt. 25 cts.**

Morning Glory

-  **Scarlett O'Hara.** All America 1939 Gold Medal Winner. A magnificent Giant Morning Glory and worthy of its Gold Medal award. It is an early bloomer, a brilliant wine-red color, with bloom 3½ to 4 inches in diameter. Vigorous and free-blooming. **Pkt. 25 cts.**

Petunia

-  **Cream Star.** (Silver Medal Winner) Soft creamy white, bluntly star-shaped flowers, with a star of cream coloring. Extremely free-flowering all season. **Pkt. 25 cts.**
-  **Orchid Beauty.** Dwarf, all-double, giant, fringed variety, averaging about 4 inches across, on sturdy plants a foot tall. Flowers are orchid or light lilac, heavily veined violet. **Pkt. 25 cts.**
-  **Salmon Supreme.** A new, dwarf bedding variety with distinct light salmon flowers, about 2 inches across, having white throats and deeply fine-lobed. Plants have a uniform height of about 1 foot and a spread of about 1½ feet. Ideal for borders, edgings, or beds. **Pkt. 35 cts.**
-  **Hollywood Star.** (Silver Medal Winner) Five pointed star shaped flowers of rose-pink with creamy yellow in throats. Leaves are long and narrow; plants at first are bushy and erect, then growing rather rankly as the season advances. **Pkt. 25 cts.**

Phlox (A)

-  **Drummond, Salmon Glory.** (Silver Medal Winner) This large flowered variety has soft but rich salmon-pink florets with distinct creamy white eyes. Each floret measuring with ordinary culture, 1¼ to 1½ inches in diameter. Grows 10 inches high. **Pkt. 25 cts.**

Scabiosa (A)

-  **Blue Moon.** Imperial Giants type, with large deep lavender-blue bee-hive shaped flowers, without the pincushion tops. Height 3-4 ft. **Pkt. 20 cts.**
-  **Heavenly Blue.** A distinct and lovely azure blue. Plants are dwarf, 18 inches, bushy, erect, with many short wiry stemmed flowers, 1½ inches across by 1 inch deep, high crowned and fully double. **Pkt. 15 cts.**

Zinnias

- Will Rogers—Giant Dahlia Flowering.** A beautiful Zinnia which has created a sensation. Color the brightest possible scarlet, and the form of flower typically Dahlia-like but of unusual size and substance. **Pkt. 10 cts.; ½ oz. 30 cts.**

ALL FLOWERS ARE DIVIDED INTO CLASSES

A.—Annual flowers produce blooms the same growing season. The seed is sown in the open ground as soon as the weather permits. If early plants are desired, the seed may be started inside during the late winter. These plants should be transplanted into the garden when all danger of frost is past. Annual plants will not live through the following winter.

B.—Biennial flowers usually require two growing seasons to bloom and complete their life. They seldom flower the first season. The seed is usually sown outdoors during June, July, and August. As the plants grow, they should be thinned to prevent crowding, and finally transplanted in the fall or spring to the place where they are to flower.

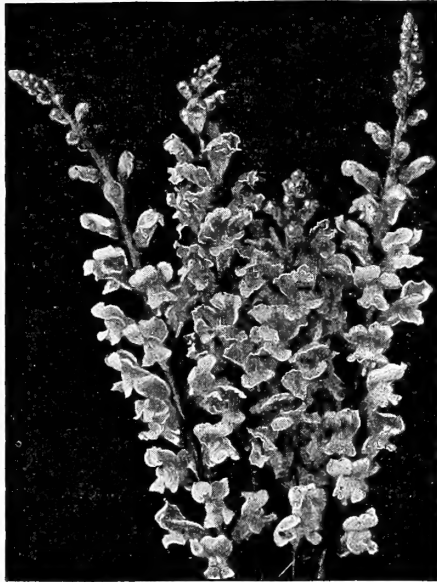

H.P.—Half-hardy Perennial flowers.

H.P.—Hardy Perennial flowers, as a rule, do not bloom until the second year, after which they continue to live over a period of years. Some perennials last a lifetime, while others may perish within three, four, or five growing seasons. There are many perennials that will flower the first year from seed, but as they do not usually live through the winter in this locality, they are generally accepted as annuals. Perennial seed, like Biennial seed, is usually sown outdoors during June, July, and August. As the plants grow, they, too, should be thinned to prevent crowding, and finally transplanted in the fall or spring to the place where they are to flower.

T.P.—Tender Perennials require the same treatment as Hardy Perennials, except they must be protected or put in the greenhouse during the winter.

Plants, Roots and Trees

Frost-Proof Cabbage Plants

Ready for shipment from December 1 to May 1
Will mature heads two to three weeks earlier
**Early Jersey Wakefield, Charleston
Wakefield, Succession, and Early Flat
Dutch.** (Copenhagen Market ready about
April 1.)

These plants are grown in the open field
during the fall and winter months, which
causes them to make a slow, tough, hardy
growth—so hardy that the outer leaves turn
to a reddish brown. They can safely be
shipped to distant points and should be
planted in the open ground from four to five
weeks earlier than frame plants.

Prices, postpaid, 100, 200, or 300 plants,
45 cts. per 100; 500 plants for \$1.50; 1,000
plants \$2.25.

Prices by Express collect, in lots of
1,000 to 4,000, \$1.25 per 1,000; 5,000 or
more, \$1 per 1,000.

These prices are only in lots of even
hundreds or thousands, and the quantity
prices apply only for lots of the
same variety.

Terms, cash with order, please.

No plants shipped C. O. D.

SUGAR CORN for Table Use

Sugar Corn

HYBRID VARIETIES

Undoubtedly, the trend in Corn is toward hybrids. They are a great deal more resistant to Stewart's disease and bacterial wilt; their root system is better, which insures less damage by winds and storm; and the ears are larger and more uniform. These factors insure larger and better crops and explain its popularity among canners, market and home gardeners.

Golden Cross Bantam. (88 days.) Sturdy, 6-foot stalk. Ears 8 inches long with 10 to 14 rows of delicious yellow buttery Corn. **Pkt. 10 cts.; lb. 30 cts.; 2 lbs. 55 cts.; 11 lbs. (pk.) \$2.75.**

GRIFFITH & TURNER'S LAWN MIXTURES

How to Make and Maintain a Beautiful Lawn

Early spring, late summer and early fall are most favorable for making or renovating a lawn. Dig the soil to a depth of 6 inches, and pulverize thoroughly. Apply G. & T. Co.'s Grass Fertilizer at the rate of 100 pounds per 2,000 square feet, and rake in well. Sow one of our Special Lawn Formulas at the rate of 1 pound for every 200 square feet, and then rake very lightly after which roll. Under favorable con-

ditions the grass should germinate in about 10 to 15 days. Do not sprinkle a new lawn with water for the first three weeks, unless the seeding is followed by very hot, dry weather, but after this time it should be watered as required. Under normal conditions, one application of our G. & T. Co.'s Grass Fertilizer each year, using half the quantity suggested above, will keep your grass in a healthy condition.

CONTROL CRAB GRASS AND JAPANESE BEETLE

by the use of Arsenate of Lead. 1 lb. of Arsenate of Lead mixed with 25 lbs. of sand is sufficient to treat 100 sq. ft.

G. & T. CO.'S IMPERIAL TURF MIXTURE. This superb grass seed is correctly proportioned to give that Old English effect, and is noted for its complete adaptability to variations in soil, climate, and other conditions. Weighs over 25 pounds to the measured bushel, which is an exceptional weight for lawn seed, and heavy seed means pure seed of highest quality. Lb. 50 cts.; 3 lbs. \$1.45; 5 lbs. \$2.35; 10 lbs. \$4.50; 25 lbs. \$10.50; 100 lbs. \$40.

G. & T. CO.'S EVERGREEN LAWN GRASS. We recommend this for large areas. It is composed of fine re-cleaned grasses and White Dutch Clover of the highest purity and vitality, carefully proportioned to give a green lawn throughout the summer. Weighs 22 pounds to the measured bushel. Lb. 40 cts.; 3 lbs. \$1.15; 5 lbs. \$1.90; 10 lbs. \$3.60; 25 lbs. \$8.50; 100 lbs. \$32.

G. & T. CO.'S BENT FORMULA. Composed of varieties which will make a permanent, luxuriant turf, finer in texture than a lawn of the ordinary type. Containing a liberal proportion of Bent Grass, it is deep, rich green in color and produces the effect of a soft rug, enduring from early spring until covered by snow. Weighs 28 pounds to the measured bushel. Lb. 75 cts.; 3 lbs. \$2.10; 5 lbs. \$3.35; 10 lbs. \$6.50; 25 lbs. \$15.50; 100 lbs. \$60.

G. & T. CO.'S SHADY NOOK GRASS. A mixture of the shade-tolerant grasses, properly blended, that will do well under trees and other shady nooks in the garden. In very stubborn cases it may be necessary to renovate for several years to obtain a rich green sward. If so, add lime each fall, as directed above, and sow seed at the rate of one pound to every 300 square feet. Lb. 50 cts.; 3 lbs. \$1.45; 5 lbs. \$2.35; 10 lbs. \$4.50; 25 lbs. \$10.50; 100 lbs. \$40.

G. & T. CO.'S TERRACE SOD MIXTURE. A mixture of grasses that will produce strong, spreading roots, withstanding drought and sun, and thriving on shallow soils. If slope is very severe, sow along with each pound of seed 1 quart of oats for every 100 square feet of lawn, to help prevent washing by heavy rains. Lb. 50 cts.; 3 lbs. \$1.45; 5 lbs. \$2.35; 10 lbs. \$4.50; 25 lbs. \$10.50; 100 lbs. \$40.

G. & T. CO.'S SEASHORE LAWN GRASS. A mixture of grasses that are especially suitable for lawns at the seashore. In preparing the soil, work in a liberal amount of sheep manure and top-dress with about 4 inches of good top-soil, as grasses will not grow well in pure sand. Lb. 50 cts.; 3 lbs. \$1.45; 5 lbs. \$2.35; 10 lbs. \$4.50; 25 lbs. \$10.50; 100 lbs. \$40.

PARK LAWN GRASS (Low-priced Mixture). This is a commercial mixture of good-quality grass seed frequently sold at a higher price. We recommend it only where a fine and durable lawn is not required. Lb. 30 cts.; 100 lbs. \$25.

HORMONE TREATED GRASS SEED. Will develop maximum root growth where favorable conditions exist. 5 lbs. of grass seed can be treated for 50c. Further information on request.

GRASS VARIETIES:

Bent. Lb. \$1.25; 3 lbs. \$3.50; 5 lbs. \$6.00.
Fancy Red Tops. Lb. 30 cts.; 3 lbs. 80 cts.; 5 lbs. \$1.25.
Kentucky Blue Grass. Lb. 40 cts.; 3 lbs. \$1.15; 5 lbs. \$1.90.
White Dutch Clover. ¼ lb. 45 cts.; ½ lb. 75 cts.; lb. \$1.25; 3 lbs. \$3.50; 5 lbs. \$6.00.
